RECOMMENDED CITATION

Mohammed loot (2025). *AGING DISORDER*. Encyclopedia of psychology. Retrieved from <https://encyclopedia.arabpsychology.com/?p=17743>

the steady functional and resistant adjustments which take place over time, which aren't as a result of illness or catastrophe, and which sooner or later contribute to a larger probability of fatality as the person gets older,

AGING DISORDER: "Some say aging disorder is inappropriately named as it implies there is some mayhem in the context of aging such as illness, but rather it merely represents the decline in health that accompanies the regular aging process."
