RECOMMENDED CITATION

Mohammed looti (2025). *ANESTHETIC*. Encyclopedia of psychology. Retrieved from <https://encyclopedia.arabpsychology.com/?p=17680>

n. any natural or synthetic substance that results in the person losing sensitivity to stimuli. May or may not produce a loss of consciousness. Can be administered via IV drip, orally, topically, or by injection.

ANESTHETIC: "The person was given a local anesthetic to numb the pain in his or her mouth during oral surgery."
