RECOMMENDED CITATION

Mohammed looti (2025). *MAGNETIC SENSE*. Encyclopedia of psychology. Retrieved from <https://encyclopedia.arabpsychology.com/?p=13687>

Is the (sometimes) subconscious ability of an organism, such as some birds to align themselves directly with the lines of force of a magnet or the magnetic fields of the Earth.

MAGNETIC SENSE: "Birds are fantastic examples of having a magnetic sense, which is the ability to align oneself with the magnetic lines of the Earth."
